

Electronic Tape Dispenser

CMC 55114

Description:

The Length of the Tape is programmable in millimeter steps. Up to 12 different Lengths can be programmed. The dispenser provides photocell actuated feed mechanism plus cutter or push-button feed and cut. At the same time two different rolls of adhesive tape can be used. In addition there is a variable deposition area or better pick up of the dispensed tape parts. Counter for specified number of units and number of parts cutted. The number of individual lengths can be programmed. Also non adhesive materials can be dispensed with this machine.

Technical Data:

Material Width:	1 Roll from 6 - 60 mm; 2 Rolls from 6 - 28 mm
Length of Stripes:	5 - 999 mm (also depending on the material)
Max. Roll Diameter:	300 mm
Power Requirement:	230 V (other on request)
Dimensions:	116 x 140 x 213 mm
Weight:	approx. 2,5 kg
